ACCESING LIBRARY CATALOGUE AND DATABASES

- If you access the library databases inside of the University you don't need to use the software Athens.
- You only need to access the address; <u>http://psm.edu/home.html</u>
- From the menu located at the top of the page press the option <u>Library</u>.
- Then click in the option <u>Libray Catalog</u>.
- On the <u>Electronić</u> <u>Reference</u> Resources click in the option <u>Databases & Tools</u>.

LIST LIST

USING OUR LIBRARY CATALOGUE

•In MyAthens you will find an alphabetical listing of the databases and other electronic resources to which we are subscribe.

•You can search for books, journals or other materials available in the library, both physical and online. If you want to see the online ones make click on the option <u>Library</u> <u>Catalog</u>.

REGISTERING TO THE ONLINE LIBRARY CATALOGUE

- To gain access to our catalog, you need to click in the option <u>Library Record</u> <u>Registration</u>.
- You will find this option in the library catalog home page on this two options.

REGISTERING TO THE ONLINE LIBRARY CATALOGUE

USING OUR LIBRARY CATALOGUE

To access the catalog you need to click <u>here</u>

USING OUR LIBRARY CATALOGUE

- Once you enter the catalog press log in.
- Then the system will prompt you asking for the username and password. Enter them, and press log in: Done!

 On this <u>search bar you</u> can make searches in all resources of the library by author, title, subject or any word.

- Once you type the topic search, the system will show you a list of all resources available in the Library.
- On the left of the page you can select to search by specific format: electronic books, journals, newspapers etc.

By clicking this option, the system will send you to the database in which the book is.

- In most cases you can enter into the database directly, but in the database Access Medicine, you need to click in the option <u>Sign</u>
 <u>in</u>. Then click in the option <u>Sign in</u>
 <u>via Athens</u> to obtain access.
- To view the contents of the book, just click on the <u>chapter you</u> want to see.

 Finally you can fully see the section that you selected. And you can print, email it or if the database provided for in chapter PDF, you can also download in this format.

ACCESING LIBRARY DATABASES

 The first database that you start to search articles is <u>PubMed with</u> <u>Full Text</u>.

BOOLEAN OPERATORS USE

- The Boolean operators are used to link two or more terms to increase or limit the search.
- AND finds documents containing both terms. This reduces the amount of operator information Ex. Cancer and HIV
- OR Finds documents containing at least one of the two terms. Increases the amount of information. Ex. Cancer or HIV
- NOT Finds documents containing the first term and reduces the amount of information Ex. Cancer not HIV

 These keywords are also used in other databases. When preparing the topic search, remember that you can use this Boolean operators for searching information more efficiently.

- In this example a topic using a Boolean search connector and the system was developed, he conducted the search. Then he displayed a list of articles related to the search topic.

After choosing the options to narrow your search, you will notice that the number of items (found in the circle) will be reduced to an appropriate number to evaluate each of them.

Once already you set the search according to your needs, you must go to the option <u>Summary</u>, open the screen and choose the option <u>Abstract</u>.

- In doing so the system will display a list in which the summaries of the articles related to the topic you are looking appear. And an <u>icon</u> that indicates whether the library has full text subscription to the journal
- If the item your looking for has this icon press it to obtain the full text article.

- This link will take you to the database where we have the journal subscription and all you have to do is look for the link to read <u>PDF</u> to download the full text article. Depending on the database, you can only display the items in HTML format.
- If that were the case, you have to press the option <u>Print</u> to display the full article including graphics and tables.

		Abstract	Background: Congenital hepatic hilar cysts are rare. Some are simple and do not require intervention, but some billary cystic malformations impose the risk of motivality on motivality of motivality of the cysts. Objectives: To assess a series of the patients presenting with congenital hepatic hildr cysts. Objectives: To assess a series of the patients presenting with congenital transmit cysts. Data regarding clinical, radiotogical, operative and pathological Benetics were analyzed and the cyst. Data regarding clinical, radiotogical, operative and pathological Benetics were analyzed. The hepatic hildr were clientified in the cyst Data regarding clinical, radiotogical, operative and pathological Benetics were analyzed. The hepatic hildr were clientified. Four of them were diagnosed prenatally. Four clifter and thereofores surgical intervention: one with intrahepatic childrech and matching the clientified heat one of processing of the common bild duct. In another case of chiedenchal cyst the the were thanked as one opposites, one child with hilling yretesia and an associated cyst of the common bild duct. In another case of chiedenchal cyst the transmittion.	

INTERLIBRARY LOAN SERVICE

•If you press an icon in PubMed to download a full text article and does not allow access it, is possible that the database has an embargo period (delay) that will allow you to not download the article. This however may have a period ranging from 3 to 24 months.

•If you need the article you can apply for interlibrary loan.

•You can send us the order form through the following link: <u>http://psm.edu/lib-loan.form</u>

•Or you can use this link: http://psm.edu/staff-directorylib.html

INTERLIBRARY LOAN SERVICE

If the Library don't have subscription to the journal, you need to send us the citation for the article that you need.

First you <u>check mark</u> the citation of the article.

7 13.	Bar J Granacol Oncol, 2015;36(1):89-72. Epidemiology of ovarian cancer in North Sardinia, Italy, during the period 1992-2010. Tanda ET, Budroni M. Cesaracolo R. Palmien G. Palomba G. Caoobianco G. Dessole M. Dessole S. Cossu A. Abstract INTRODUCTION: The aim of this study was to analyze and describe the incidence and mortality trends of ovarian cancer in North Sardinia, Takin, in the period 1992-2010. MATERIALS AND METHODS: Data were obtained from the tumor registry of Sassari province which makes part of a wider registry web, coordinated today by the Italian Association for Tumor Registries. RSULTS: The overall number of ovarian cancer cases registreed in the period under investigation was 500. The mean age of the patients was 62 years. The standardized incidence and mortality transmic ancere was evidenced. Relative survival at the years from diagnosis was 44 2%. CONCLUSIONS: The incidence and mortality trends of ovarian cancer in North Sardinia remained relatively stable in the last decades, while prognosis remains relatively poor.
